

## HB RACING D418 ARM MOUNT SETS

New from HB Racing are D418 arm mount sets that allow racers to lower the roll center of the D418 buggy for the new breed of high grip astroturf and carpet race tracks. The new arm mounts are numbered for easy identification, machined from aluminum, and hard anodized black. Sold in pairs.

Note: Intended for use with 204564 D418 Rear Gear Box Set (For High Grip Tracks)

### Tips:

In general, if the rear has too much grip, try changing to a lower rear roll center using the new Arm Mounts 4, 5 or 6. If you need more rear grip, try a higher rear roll center.

The same may apply to the front end, if the front has too much grip, try changing to a lower front roll center. If you need more front grip, try a higher front roll center.
