

HB RACING D819 38MM SHOCK SHAFT

New from HB Racing are new rear shock shafts and shock ends that improve durability on the D819 buggy. The new shock shafts are 5mm longer, so the metal shaft extends into the plastic eyelet, preventing breakage. The new "V2" shock ends are shorter, reducing the chances of flex in extremely hot conditions. The overall length of the shock remains the same when using the new shafts and shock ends, so geometry is not affected. Our HB Team Drivers recommend this upgrade for all conditions.

Compatible with: D819, D817V2

204457 38mm Stroke Shock Shaft (+5mm extension/2pcs)
204570 Shock End V2 (Long/4pcs)
